

Assembly Instruction

**LED-bar kit for
Full profile boxes for
Tamiya Scania 3-axle (1:14,5)**

Best.-Nr.: 2016-9131-3A-LL

Version 1.0 – 20.06.2016

General Description

This polystyrene-milled parts set for 2 LED strips is available as an accessory to the full profile boxes for Tamiya Scania 3-axle (1: 14.5).

The LED strips can be screwed at the underside of the full profile boxes and have an attachable front panel, which can be painted accordingly.

Assembly Procedure

Before you put the parts together please read the assembly instructions carefully and pay attention to the assembly sequence and test the fitting accuracy of the parts before gluing them together.

It is helpful to fix the parts at first only on a few points with super-glue and after a check along the edges fully with super-glue or a polystyrene-glue.

The parts are made of polystyrene, if you use super-glue in combination with activator spray, please be aware that the activator spray can destroy polystyrene – because of that you should use it very carefully or use only polystyrene-glue.

2x

- LED's wie abgebildet nur zusammenstecken (auf einheitliche Polung achten)
- LEDs as shown only plugged together (pay attention to uniform polarity)

- LED's/Leiter wieder entfernen
- LED-Leiste zusammensetzen und verkleben
- Remove LED's/circuit board
- assemble and glue LED-bar

LEDs mit Widerstand (Einzel- und Parallelschaltung)

[illegible]

Aufbau der LED-Leiste

Scania 3-Achser

Widerstandswerte je nach Versorgungsspannung und Anzahl der parallel geschalteten LEDs aus beiliegender Tabelle entnehmen
(*) für 8 LEDs / (**) für 5 LEDs / (***) für Einzel-LED

Annotation:

Please pay attention to the technical data of the appended LEDs.
